User Guide for the PassBy[ME] iOS Application

1 Introduction

This user guide provides an overview of the basic knowledge needed to successfully set up, and use the PassBy[Me] iOS application.

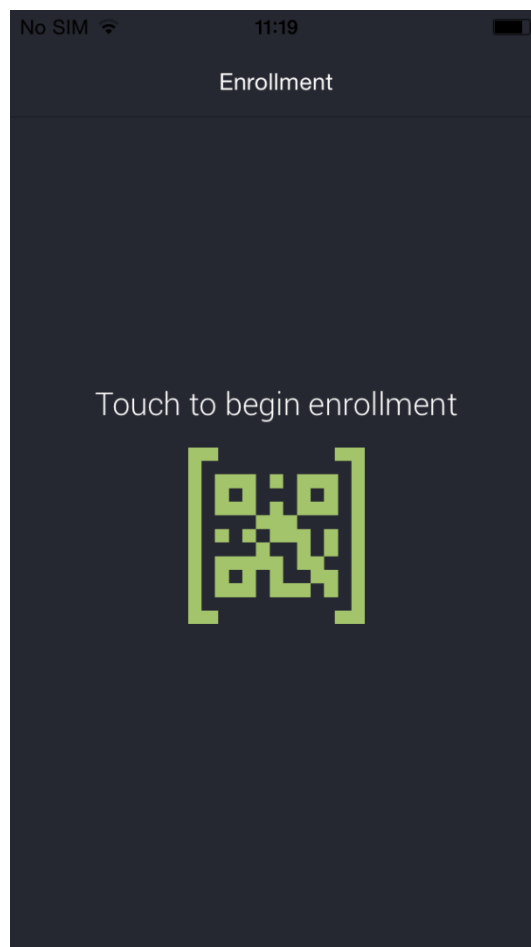

2 Setting up the PassBy[Me] application

2.1 Installing

Open the App Store on your device, and search for Microsec Ltd.'s PassBy[Me] app. Simply type 'passbyme' into the search field and hit search. Install it as usual by tapping Get, then Install.

2.2 Setting up your application

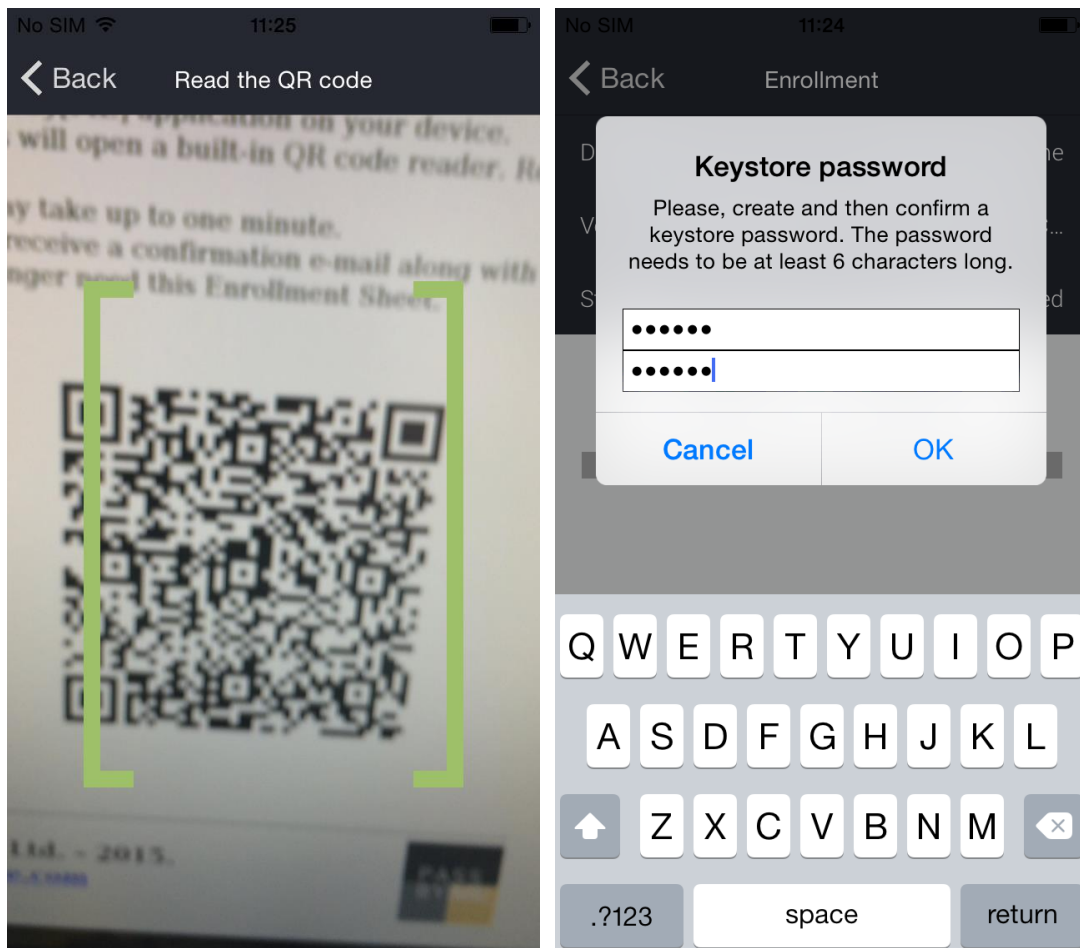

After successfully installing the application, tap on its icon on the home screen. On the first launch, the app will ask for permissions to manage the phones notifications. Then you'll be presented with the image of a QR code. Touch it to begin enrollment.

User Guide for the PassBy[ME] iOS Application

Point your device's camera to the QR code on the enrollment sheet you received from your provider.

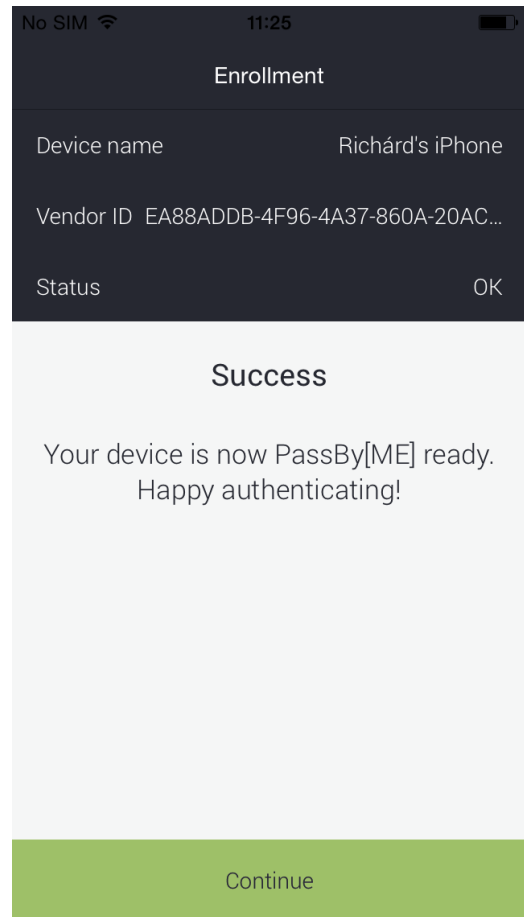

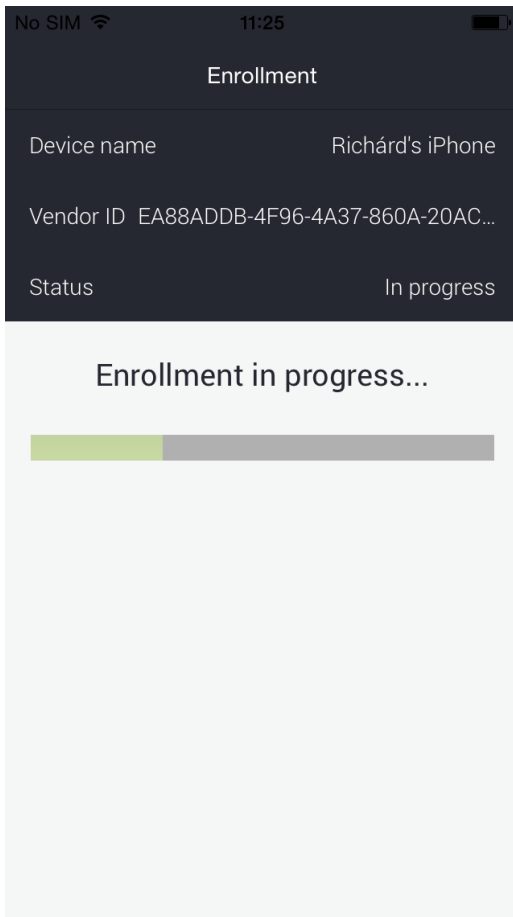

Scan the code, then create a passphrase and confirm it as prompted. This password as a PIN code will protect the generated identity data on your mobile device. The password has to be at least 6 characters long. You will be prompted to use this password in the authentication procedure.

User Guide for the PassBy[ME] iOS Application

The application will begin the enrollment shortly. After successfully finishing the process, your device is ready for authentication.

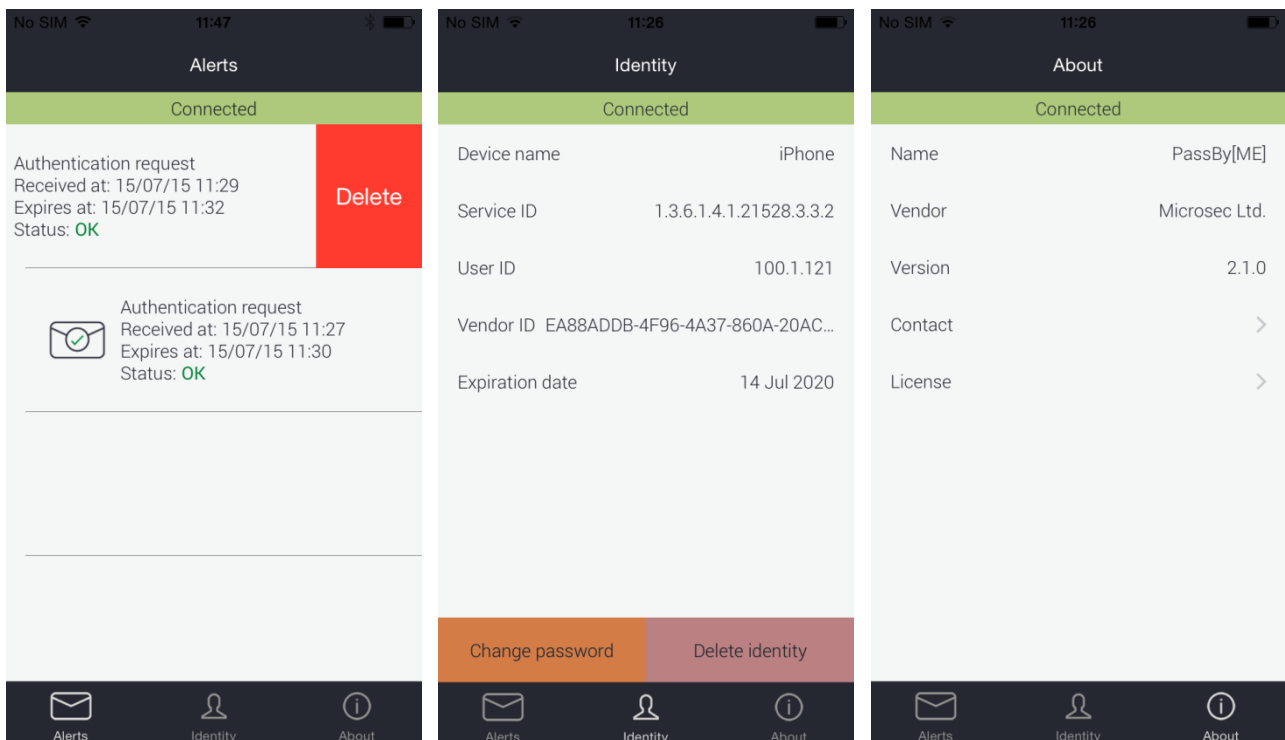

3 Using the PassBy[Me] application

3.1 The application's main menu

There are three tabs on the main page of the menu.

- On the **Alerts** tab you can review and manage your recent authentication attempts. Swipe left on an alert, to delete it.
- **Identity** gives you basic information, such as your device's name, Service ID, User ID, Vendor ID, and the Expiration date of your identity data. This information is not required during normal operation, but may be required for troubleshooting or deactivation purposes by PassBy[ME] service administrators. You are also able to delete your identity, or change your keystore password.
- The **About** menu shows you the application's version, and lets you read the End User License Agreement.

3.2 Authenticating with the app

Once you are accessing a service that needs authentication through PassBy[Me], you will get a notification on your PassBy[Me] enabled device. This notification will be shown on the notification bar of your device, or in case you have already opened the app, on the alerts tab. This may take a few seconds.

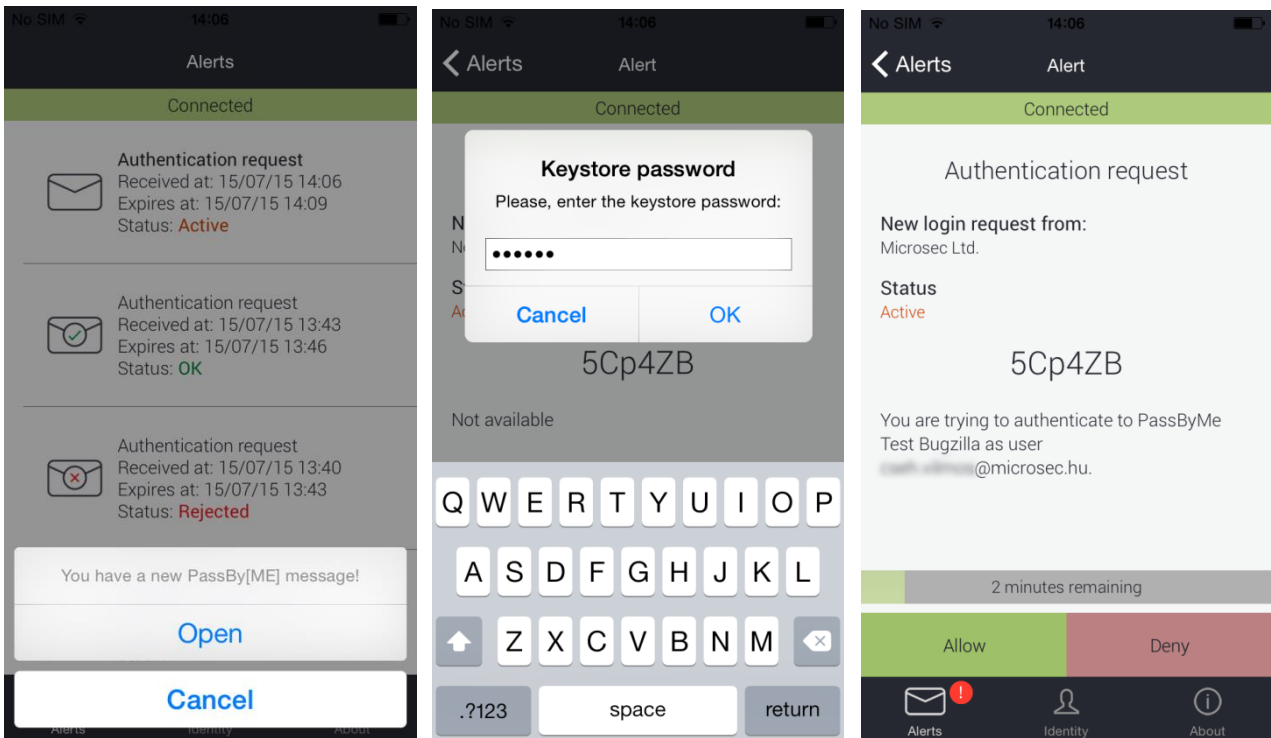

User Guide for the PassBy[ME] iOS Application

Tap on the notification, or open the PassBy[ME] app, and go to the alerts tab, to open the message.

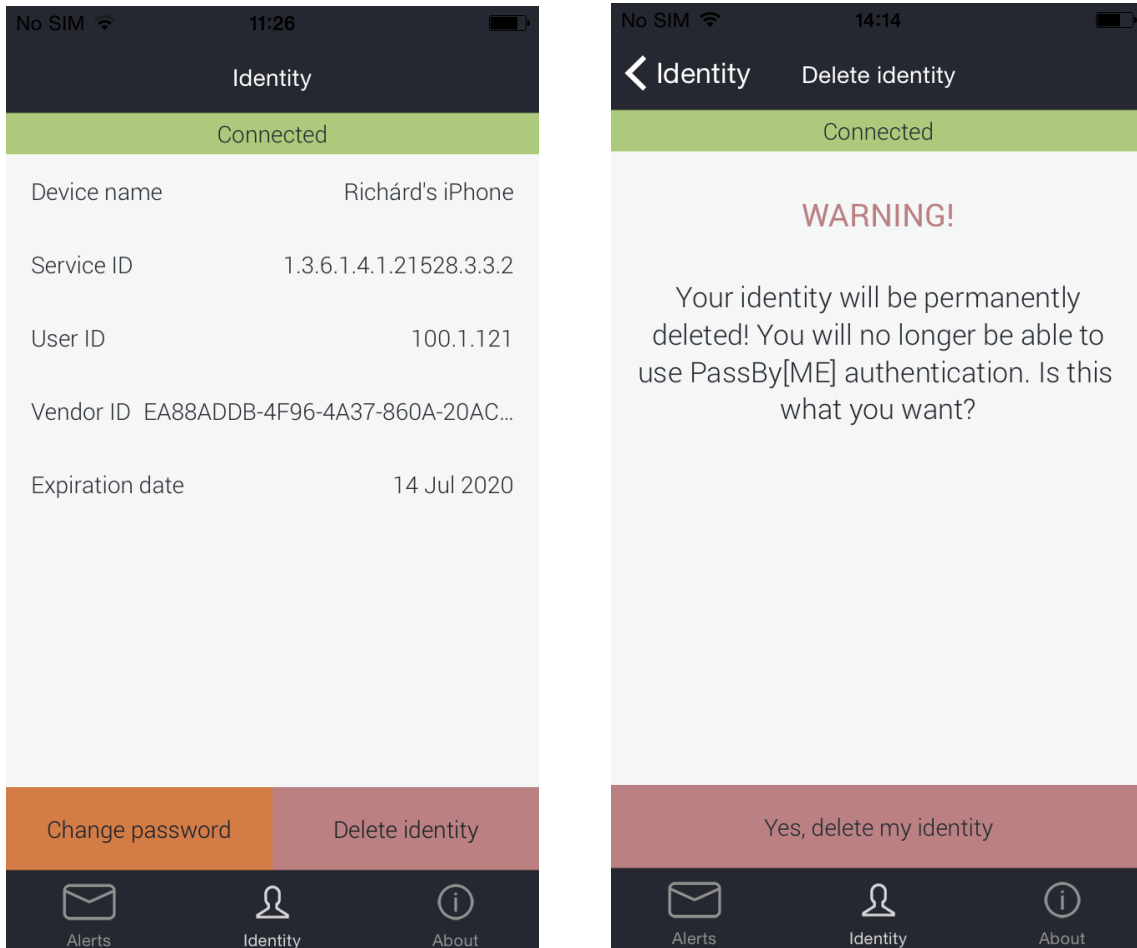

When prompted, enter your password, and tap OK, to view the request.

Press “Allow”, to authenticate or confirm the transaction or tap “Deny”, if you want to cancel the transaction.

3.3 Deleting your Identity

Once your identity has expired, or you want to install a new one on your device, you may want delete the old one. To do so, launch PassBy[Me], go to the Identity tab and hit Delete identity. You will be prompted if you do really want to delete your identity. Hit yes to permanently erase it, or No to keep it.

3.4 Updating the application

Be sure to keep your PassBy[Me] app updated! After updating, there is no need for new enrollment, the program keeps your identity as long as you don't delete the app itself.
